

ENVIRONMENTAL POLICY

One of CTT's commitments is to control and minimise the environmental impact of our activity. Aware of the footprint of our activity on the environment, we are committed to develop our work from the protection, conservation and respect for the environment, assuming responsibilities in its defence, acquiring the following commitments:

- To guarantee and maintain compliance with the environmental regulations applicable to CTT's activities, products and services and with those commitments that the company voluntarily subscribes to.

- To promote the development of processes and procedures that cause the minimum environmental impact, as well as to prevent, control and minimise the risks of environmental pollution that its activity may generate on the environment.

- To exercise responsible consumption of natural resources and reduce the use of dangerous products and the generation of waste.

- To manage the waste generated in CTT in an environmentally friendly way, performing a correct segregation and recycling, as well as an adequate intermediate and final storage of those waste materials.

- To guarantee that the Environmental Policy and related regulations are known by all employees through adequate training that allows them to be aware of the environmental aspects that affect the company and their activities

- To train and raise awareness the company's workers in order to promote their participation in the protection of the environment.
